

AOXX: Project Title

Candidate number: XXXXX

Supervisors: Dr. A. Scientist

Word count: XXXX

Abstract

Abstract.

Future work: What you would recommend to be done next

Acknowledgement

Acknowledge who helped.

1 Introduction

Outline the problem you are going to address

- State specific objectives

- Give background science

- Summarise the current state of knowledge

1.1 Example of subsection

These may be presented as subsections

2 Method

A description of the instrument/model you are going to use.

3 Results

Describe what you have done

- Make sure you do an error analysis

- At the end, summarise what you have found out

4 Conclusions

Summarise your project

- How has the uncertainties of the science been reduced

- Have you achieved the objectives stated in the introduction
